

My research group **Hazards, Vulnerability, and Risk Decision Making** at the **Department of Geography at the University of Alabama** is accepting applications for a Ph.D student with assistantship, who will start in Fall, 2023. The assistantship provides a stipend plus tuition remission. The successful applicant will work with me and will be involved in projects focused on **the intersection of water hazards, community vulnerability, and risk decision making**.

Qualified candidates should have a Master's degree in Geography, Environmental Studies/Sciences, Planning or a related discipline. Candidates should have a strong interest in the intersection of social and physical dimensions of hazards and be eager to work in an interdisciplinary environment. Experience in geographic information systems (GIS), remote sensing, quantitative data analysis are desired. Strong oral and written communication skills are required.

For more information about this assistantship, please contact me at wshao1@ua.edu as soon as possible. Please include a copy of your CV, unofficial academic transcripts, and a brief personal statement that highlights skills relevant to the position.

For more information about the department, please see <https://geography.ua.edu/>.
